Re: PS Docket No. 07-114, Wireless E911 Location Accuracy Requirements

Dear Secretary Dortch:

The County Judges Association of Arkansas fully supports the proposed FCC regulations for the enhanced rules for the automation location of wireless phone calls indoors and outdoors, whether calling from a fixed line or wireless handsets. The establishment of automated location and accuracy standards provided for PSAP calls including wireless calls initiated indoors will directly assist in public safety. The deployment of effective location services indoors will assist in fire services, medical services, law enforcement services and emergency services to residents in urban and rural locations.

The County Judges Association of Arkansas requests the FCC to take necessary action to ensure the deployment of effective, affordable, readily deployable, and easy to use indoor location technology that will enhance the accuracy needs to public safety in a timely fashion. We respectfully request the FCC to enforce current location standards and to adopt new or enhanced standards for indoor location accuracy to promote public safety to our citizenry.

Sincerely,

White County Judge Michael Lincoln
President, County Judges Association of Arkansas
